

# DRY DESERT

COLLECTION

Engineered hardwood is a versatile alternative to solid hardwood. Unlike solid hardwood, which is one piece of wood milled from a tree, engineered wood flooring is actually made of several wood plies (layers) that are fused together under heat and pressure. Engineered hardwood flooring is real wood flooring, but is more stable than solid wood. Engineered wood flooring is less susceptible to shrinking and expanding with changes in temperatures and humidity while the multiple wood layers in engineered hardwood make it very durable.

Warranty: 30-Year Residential and 3-Year Commercial Warranty when installed and maintained in accordance with Bel-Air recommended installation and maintenance Instructions.
